                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <ul> <li>Foreist Stewardship Council: FSC                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | E.       Forest Stewardship Council Expectific Experts Stewardship Council Guidelines.       7. around ductwork         F. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressured at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verific.         1.       U.S. Environmental Protection Agency:       immediately. Contractor shall notify the Architect and Green Verific.         2.       EPA 832-052-Storm Water Management Practices.       conduct a infrared scan when the house or dwelling provide access to each unit and cooperate with contractor shall sheelule the inspection since seasary due to incomplete work shall be back-chared to the Contractor.         3.       EPA 402-K01-002 – A Step-Dy-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that if negressurized at 25 Pascals. Materials used for Scorestall By Stopped" meases that all relaces will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypass sealing are determined by the size and location of the bypass. T Essentially Stopped."                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <ul> <li>Forest Stewardship Council: FSC                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Image: Gene Seal: Gene Seal: Gene Seal: Gene Seal: Gene Seal: Gene Seal: Gene Seal: Gene Seal: Gene Seal: Gene Seal: Gene                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <ul> <li>Green Seal: CS-11 - Product Specific Environmental Requirements</li> <li>Sheet Metal and Air Conditioning  Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections necessary due to incomplete work shall be<br>01445.       the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasse are sealed in such a manner that the movement of air is "Essentially         4. OthioHousing Finance Agency       Stopped"" Essentially Stopped" means that air leakage will not be detected by an infrared      Contractor shall provide access to each unit and cooperate with<br>0.1445.         3. EPA 402:K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped" "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Green Seal: GS-11 - Product Specific Environmental Requirements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Green Seal: CS-11 - Product Specific Environmental Requirements.       8. electrical work and         Shet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R892-005. Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       E. Attic Bypass Inspection in the otis conduct a visual Attic Bypass Inspection with no less than two weeks' notice to non-ditaty. Contractor shall notify the Architect and Green Verifier         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section on 1145.       C. Attic Bypasse are sealed in such a manner that the movement of air is "Essentially Conditions Inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasse are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not the detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bippass passes are beaking are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Green Seai: CS-11 - Product Specific Environmental Requirements       8. electrical work and         Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R89-2005.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section of the Green Nerifier, Contractor shall note work shall be back-charged to the Conduct or to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Contractor shall schedule the inspections excessary due to incomplete work shall be back-charged to the contractor.         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that ari leakage will not the detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bypass sealing are determined by the size and location of the bypass. These materials       Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R89-2005.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section of the Green Nerifier, Contractor shall note work shall be back-charged to the Conduct or to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Contractor shall schedule the inspections excessary due to incomplete work shall be back-charged to the contractor.         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that ari leakage will not the detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Green Seal: GS-11 - Product Specific Environmental Requirements.       8. electrical work and         Shet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section on 1445.       E. PA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section on 1445.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is Sestentially Stopper's means that ari leakage will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals.         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic bypasses are sealed in such a manner that the movement of air is depressurized at 25 Pascals.         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic bypasses are sealed in such a manner that the movement of air is depressurized at 25 Pascals.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is depressuri                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Green Seal: GS-11 - Product Specific Erwinomental Requirements.       8. electrical work and         Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U.S. Erwinomental Protection Agency:       0. detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management For Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       0. detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that leakage will not be detected by an infrared Scopped".         1. Limited Scope Rehabilitation Sustainability Standard       Scopped." "Essentially Stopped" means that leakage will be to detected by an infrared sea.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Green Seal: GS-11 - Product Specific Erwinomental Requirements.       8. electrical work and         Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U.S. Erwinomental Protection Agency:       0. detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1.  Contractor shall provide access to each unit and cooperate with or onducting of the test. Additional inspections necessary due to incomplete work shall be oack-charged to the Contractor.         0. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially  EVA 402-K-01:002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Green Seal: GS-11 - Product Specific Environmental Requirements.       8. electrical work and         Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U.S. Environmental Protection Agency:       0. EPA 832-R92-005 - Storm Water Management for Construction Activities: Developing immediately. Contractor shall notify the Architect and Green Verifier Contractor shall notify the Green Verifier. Contractor shall provide access to each unit and cooperate with or less than two weeks' notice to pollution Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section or 100 of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are seled in such a manner that the movement of air is "Essentially                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Green Seal: GS-11 - Product Specific Environmental Requirements.       8. electrical work and         Sheet Metal and Air Conditioning Contractors: SMACNA IAQ                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leasts in the attic. Contractor shall schedule the inspection with no less than two weeks notice to points         U.S. Environmental Protection Agency:       .         1. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan. When the house or dwelling unit is depressured at 25 Pascals. Materials used for bypass Sealing are determined by the size and location of the bypass. These materials EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section on the Green Verifier to conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         Buildings under Construction.       9. attic access points         D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any lease in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to perform mediately. Contractor shall schedule the inspection with no less than two weeks' notice to the Green Verifier.         2. EPA Baseline IAQ - Tasting for Indoor Air Quality, Baseline IAQ, and Materials Section of 01445.       E. Attic bypasses are sealed in such a manner that the owner tof air is "Essentially Stopaes" "Essentially Stopae" "essentially Stopae" "essentially Stopae" "essentially Stopae" means that air leakage will not be detected by an Infrared scan. When the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypasses are sealed in such a manner that the buyees or development.         1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         Buildings under Construction.       9. attic access points         D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to Palitition Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ Testing for Indoor Air Quality, Baseline IAQ, and Materials Section on the Green Verifier. Contractor shall schedule the inspection with no less than two weeks' notice to back-charged to the Contractor.         0. Hird Scope Rehabilitation Sustainability Standard       E. Attic Bypasse are sealed in such a manner that the movement of air is "Essentially Scoped" "ressent that air leakage will not be detected by an infrared scan, when the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypasses are sealed in such a manner that the size and location of the bypass. These materials   Contractor shall Instity House Attice Bypass Inspection with no less that and cooperate with or Inspections necessary due to incomplete work shall be back-charged to the Contrac                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection — The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to the Green Verifier Contractor shall provide access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         0.1445.       E. PA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes Of Welling unit is depressurized at 25 Pascals. Materials weed in such a manner that the house or dwelling unit is depressurized at 25 Pascals. Materials used for buypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection — The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to the Green Verifier Contractor shall provide access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         0.1445.       E. PA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes Of Welling unit is depressurized at 25 Pascals. Materials weed in such a manner that the house or dwelling unit is depressurized at 25 Pascals. Materials used for buypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832: R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection with no less than two weeks notice to the Green Verifier Contractor shall schedule the inspection with no less than two meeks notice to nonducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Contractor.         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic Bypass Inspection and conducting of the buse or dwelling unit is depressured at 25 Pascals.         0. Limited Scope Rehabilitation Sustainability Standard       E. Attic Bypass are sealed in such a manner that the movement of air is "Essentially Scope".         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic Bypass are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass are sealed in such a manner that the one ever of welling unit is depressurized at 25 Pascals to the Green Verifier Contractor shall bothedule the inspection with no less than two weeks' notice to the Green Verifier Contractor shall provide access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes Of Met Building Infrared Scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass are sealed in such a manner that the one ever of welling unit is depressurized at 25 Pascals to the Green Verifier Contractor shall bothedule the inspection with no less than two weeks' notice to the Green Verifier Contractor shall provide access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 3. Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       0. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractors shall schedule the inspection with no less than two weeks' notice to point and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conducting of the test. Additional inspection with no less than two weeks' notice to the Green Verifier Contractor shall schedule the inspection with no less than two weeks' notice to the Green Verifier Contractor shall schedule the inspection with no less than two weeks' notice to conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         2. EPA Baseline IAQ. Testing for Indoor Air Quality, Baseline IAQ, and Materials Section of 01445.       E. Attic Bypasses are sealed in such a manner that the novement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bippass frame dations in green Communities         0. Divide Access provide access provide access provide access provide access provide access provide access provide access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402r-K-01:002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the leakage will not be detected by an infrared scan when the house or dwelling unit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 3. Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       0. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractors shall schedule the inspection with no less than two weeks' notice to the Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to the Green Verifier Contractor shall schedule the inspection with no less than two meeks' notice to the Green Verifier. Contractor shall provide access to each unit and cooperate with conducting of the test. AddOitional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01:002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the novement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 3. Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       0. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractors shall schedule the inspection with no less than two weeks' notice to the Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to the Green Verifier Contractor shall schedule the inspection with no less than two meeks' notice to the Green Verifier. Contractor shall provide access to each unit and cooperate with conducting of the test. AddOitional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01:002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the novement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <ul> <li>Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and<br/>conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to<br/>detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to<br/>the Green Verifier Contractor shall schedule the inspection with no less than two weeks' notice to<br/>the Green Verifier Contractor shall schedule the inspection necessary due to incomplete work shall be<br/>back-charged to the Contractor.</li> <li>EPA 832-R-92-005 - Storm Water Management Practices.</li> <li>EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br/>01446.</li> <li>EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes<br/>01446.</li> <li>E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br/>Stopped" "Essentially Stopped" means that air leakage will not be detected by an infrared<br/>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for<br/>bypass sealing are determined by the size and location of the bypass. These materials</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <ul> <li>Sheet Metal and Air Conditioning Contractors: Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and<br/>conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to<br/>detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to<br/>the Green Verifier.</li> <li>EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br/>Pollution Prevention Plans and Best Management Practices.</li> <li>EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br/>01446.</li> <li>EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes<br/>Of H46.</li> <li>EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes<br/>Of H46.</li> <li>I. Limited Scope Rehabilitation Sustainability Standard</li> <li>E. Attic bypasses are eaded in such a manner that the movement of air is "Essentially<br/>Stopped", "Essentially Gorperservice at 25 Pascals. Materials used for<br/>bypass sealing are determined by the size and location of the bypass. These materials</li> </ul> | Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9: attic access points         Buildings under Construction.       D. Attic Bypass Inspection - The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         Applications.       D. Attic Bypass Inspection - The Green Rater will conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       detect any leaks in the etst. Contractor shall provide inspections vith no less than two weeks' notice to not not not cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section - the Contractor.       conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         Ohio Housing Finance Agency       Stopped" "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       0. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         Applications.       0. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with to less than tow oweeks' notice to not the Green Verifier.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section of U445.       conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are seed in such a manner that the movement of air is "Essentially Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to pollution Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section or 04445.       E. Attic Bypasses are seeled in such a manner that the movement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan, when the house or dwelling unit is depressurized at 25 Pascals. Materials used for busing Finance Agency:         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic Bypasse are seeled in such a manner that the movement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan. When the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypass seeling are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Maragement District: SCAQMD Rule 1168 - Adhesive and Sealant       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leasts in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section or 01445.         2. EPA Baseline IAQ - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" "Essentially Stopped" "Essentially Stopped" means that air leakage will not be detected by an infrared scan. When the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypasses are greated in Such and merials used for bypasses are are conducting of the bypass. Adherials used for bypasses are are conducting of the bypass. Adherials used for bypasses are are din great to 25 Pascals. Materials used for bypasses are are din great to 25 Pascals. Materials used for bypasses are are din such are singling and etermined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         South Coast Air Quality Maragement District: SCAQMD Rule 1168 - Adhesive and Sealant       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leasts in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section or 01445.         2. EPA Baseline IAQ - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" "Essentially Stopped" "Essentially Stopped" means that air leakage will not be detected by an infrared scan. When the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypasses are greated in Such and merials used for bypasses are are conducting of the bypass. Adherials used for bypasses are are conducting of the bypass. Adherials used for bypasses are are din great to 25 Pascals. Materials used for bypasses are are din great to 25 Pascals. Materials used for bypasses are are din such are singling and etermined by the size and location of the bypass. These materials Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with or less than two weeks' notice to the operate with or less than two operate with or less than two operate with or less than two operate with or less than two operate with or less than two operate with or less than two operate with or less than two operate with or less than the contractor.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section or lot of the Contractor.       conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared         Ohio Housing Finance Agency       E. Att                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         Dublications:       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leasts in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       D. Attic Bypass Inspection adcover a when the house or dwelling unit is depressurized at 25 Pascals to detect any leasts in the attic. Contractor shall notify the Architect and Green Verifier         0.1445.       EPA 832-R-92-005 - Storm Water Management Practices.       Contractor shall provide access to each unit and cooperate with no less than two weeks' notice to conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that in leakage will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypass. These materials         1. Limited Scope Rehabilitation Sustainability Standard       Enterprise Green Communities       Stopped" means that air leakage will not be detected by an infrared scan. Materials used for bypass. Sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         Dublications:       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leasts in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       D. Attic Bypass Inspection adcover a when the house or dwelling unit is depressurized at 25 Pascals to detect any leasts in the attic. Contractor shall notify the Architect and Green Verifier         0.1445.       EPA 832-R-92-005 - Storm Water Management Practices.       Contractor shall provide access to each unit and cooperate with no less than two weeks' notice to conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that in leakage will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypass. These materials         1. Limited Scope Rehabilitation Sustainability Standard       Enterprise Green Communities       Stopped" means that air leakage will not be detected by an infrared scan. Materials used for bypass. Sealing are determined by the size and location of the bypass. These materials  access points         Buildings under Construction.       9. attic access points         Duildings under Construction.       9. attic access points         Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and<br>conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to<br>detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier<br>immediately. Contractor shall notify the Architect and Green Verifier<br>pollution Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - acting for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       E. Attic bypasse are sealed in such a manner that the movement of air is "Essentially<br>Stopped" "Essential" Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals.         Ohio Housing Finance Agency       1. Limited Scope Rehabilitation Sustainability Standard         1. Limited Scope Rehabilitation Sustainability Standard       E. Attic bypasse are sealed in such a manner that house or dwelling unit is depressurized at 25 Pascals. Materials used for<br>bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         Duildings under Construction.       9. attic access points         Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and<br>conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to<br>detect any leasis into attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall notify the est. Adultional inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped" "Essential" Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for<br>bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         Duildings under Construction.       9. attic access points         Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and<br>conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to<br>detect any leasis into attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall notify the est. Adultional inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped" "Essential" Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for<br>bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic.
