"Essentially Stopped" means that air leakage will not be detected by an infrared</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <ol> <li>EPA 832-R-92-005 - Storm Water Management for Construction Activities: Homes</li> <li>EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped" "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         J. Limited Scope Rehabilitation Sustainability Standard       scan when the house or dwelling are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>Pollution Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         J. Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         4. Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplete work shall be         01445.       conducting of the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J. Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared         1. Limited Scope Rehabilitation Sustainability Standard       scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>Pollution Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         J. Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         4. Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <ol> <li>EPA 832-R-92-005 - Storm Water Management for Construction Activities:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 1. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped" means that air leakage will not be detected by an infrared         J. Ohio Housing Finance Agency<br>1. Limited Scope Rehabilitation Sustainability Standard       E. Attic bypasses are greated in such a manner that the house or dwelling unit is depressurized at 25 Pascals. Materials used for<br>bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>Pollution Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         J. Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to<br>back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         4. Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplete work shall be         01445.       conducting of the contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J. Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared         1. Limited Scope Rehabilitation Sustainability Standard       scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J. Ohio Housing Finance Agency       Stop Rehabilitation Sustainability Standard       E.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | I. U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplete work shall be         01445.       back-charged to the Contractor.       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 1.       U.S. Environmental Protection Agency:         1.       EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         2.       EPA 8aseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.       Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J.       Ohio Housing Finance Agency<br>1.       Limited Scope Rehabilitation Sustainability Standard       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         K.       Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | I.       U.S. Environmental Protection Agency:         1.       EPA 832-R-92-005 - Storm Water Management Practices.         Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to the Green Verifier. Contractor shall provide access to each unit and cooperate with         2.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       contucting of the test. Additional inspections necessary due to incomplete work shall be due to incomplete work shall be due to incomplete work shall be due to incomplete work shall be due to incomplete work of air is:         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.         J.       Ohio Housing Finance Agency       Attic bypasses are sealed in such a manner that air leakage will not be detected by an when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         1.       Limited Scope Rehabilitation Sustainability Standard       scan when the house or dwelling unit is depressurized at 25 Pascals.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 1. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>Stopped." "Essentially Stopped" means that is depressurized at 25 Pascals. Materials used for                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| I.       U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1.       EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplet work shall be         0.1445.       back-charged to the Contractor.       back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J.       Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1.       U.S. Environmental Protection Agency:         1.       EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         2.       EPA 8aseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.       Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>0. Limited Scope Rehabilitation Sustainability Standard         K.       Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | I.       U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1.       EPA 832-R-92-005 - Storm Water Management For Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         2.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3.       EPA 402-KC11-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.       Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>charge for the house or dwelling unit is depressurized at 25 Pascals. Materials used for         K.       Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <ul> <li>U.S. Environmental Protection Agency:</li> <li>1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 1.       U.S. Environmental Protection Agency:         1.       EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         2.       EPA 8aseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.       Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J.       Ohio Housing Finance Agency<br>1.       Limited Scope Rehabilitation Sustainability Standard       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared<br>scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         K.       Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <ul> <li>U.S. Environmental Protection Agency:</li> <li>1. Additional inspections necessary due to incomplete work shall be         01445.       back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J.       Ohio Housing Finance Agency       Stopped." means that air leakage will not be detected by an infrared         1.       Limited Scope Rehabilitation Sustainability Standard       scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| I.       U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1.       EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J.       Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | I.       U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1.       EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplete work shall be         01445.       01445.       back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1. U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Dans and Best Management Practices.       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section 01445.       conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J. Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         K. Enterprise Green Communities       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <ul> <li>U.S. Environmental                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | I.       U.S. Environmental Protection Agency:         1.       EPA 832-R-92-005 - Storm Water Management Practices.         Pollution Prevention Plans and Best Management Practices.       immediately. Contractor shall schedule the inspection with no less than cooperate with         2.       EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       contractor shall provide access to each unit and cooperate work shall be         01445.       contractor.       back-charged to the Contractor.         3.       EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.       Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J.       Ohio Housing Finance Agency       Stopped." "Essentially Stopped." means that air leakage will not be gor exercised at 25 Pascals. Materials used for         1.       Limited Scope Rehabilitation Sustainability Standard       scon when the house or dwelling unit is depressurized at 25 Pascals.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         I. U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conduct inspections necessary due to incomplete work shall be         01445.       back-charged to the Contractor.       back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Applications.Conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to1. U.S. Environmental Protection Agency:a conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to1. EPA 832-R92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier<br>immediately. Contractor shall provide access to each unit and cooperate with<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant HomesE. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped."                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832.Res2:005 - Storm Water Management Practices.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to pollution Prevention Plans and Best Management Practices.         2. EPA 832.Res2:016 - Storm Water Management Practices.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to the Green Verifier. Contractor shall schedule the inspection with no less than two weeks' notice to incomplete work shall be onducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic Dypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         J. Limited Scope Rehabilitation Sustainability Standard       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         I. U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conduct inspections necessary due to incomplete work shall be         01445.       back-charged to the Contractor.       back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Applications.Conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to1. U.S. Environmental Protection Agency:a conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to1. EPA 832-R92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier<br>immediately. Contractor shall provide access to each unit and cooperate with<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant HomesE. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped."                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832.Res2:005 - Storm Water Management Practices.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to pollution Prevention Plans and Best Management Practices.         2. EPA 832.Res2:016 - Storm Water Management Practices.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to the Green Verifier. Contractor shall schedule the inspection with no less than two weeks' notice to incomplete work shall be onducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic Dypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         J. Limited Scope Rehabilitation Sustainability Standard       bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         I. U.S. Environmental Protection Agency:       detect any leaks in the actio. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Prevention Plans and Best Management Practices.       detect any leaks in the action shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section 01445.       conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are seented in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared         J. Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared         1. Limited Scope Rehabilitation Sustainability Standard       conduct a infrared access or dwelling unit is depressurized at 25 Pascals. Materials used for                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U.S. Environmental Protection Agency:       detect any leaks in thractify the Architect and Green Verifier         1. Ohio Housing Finance Agency       Stopped." "Esamially Stopped" means that air leakage will not be detected by an Infrared         1. Limited Scope Rehabilitation Sustainability Standard       scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         I. U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. BPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall notify the Architect and Green Verifier         1. EPA 8aseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conducting of the test. Additional inspections necessary due to incomplete work shall be         0. 1445.       a. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially         J. Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         I. U.S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing       immediately. Contractor shall schedule the inspection with no less than two weeks' notice to         Pollution Prevention Plans and Best Management Practices.       the Green Verifier. Contractor shall provide access to each unit and cooperate with         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section       conduct inspections necessary due to incomplete work shall be         01445.       back-charged to the Contractor.       back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Applications.Conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to1. U.S. Environmental Protection Agency:a conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to1. EPA 832-R92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier<br>immediately. Contractor shall provide access to each unit and cooperate with<br>the Green Verifier. Contractor shall provide access to each unit and cooperate with<br>conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the Contractor.3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant HomesE. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped."                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Applications.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832.R-82-005 - Storm Water Management Practices.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall schedule the inspection with no less than two weeks' notice to pollution Prevention Plans and Best Management Practices.         2. EPA 832.R-82-005 - Storm Water Management Practices.       conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to the Green Verifier. Contractor shall schedule the inspection with no less than two weeks' notice to incomplete work shall be onducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic Dypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for         J. Limited Scope Rehabilitation Sustainability Standard       bypass sealing are determined by the size and location of the bypass. These materials | H. South Čoast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant<br>Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and<br>conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to<br>detect any leaks inspection with e Architect and Green Verifier.         I. U.S. Environmental Protection Agency:       detect any leaks inspection with e Architect and Green Verifier.         I. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing<br>Pollution Prevention Plans and Best Management Practices.       detect any leaks inspection with e Architect and Green Verifier.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>01445.       conducting of the test. Additional inspections necessary due to incomplete work shall be<br>back-charged to the contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypase are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared     EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasse are sealed in such a manner that the movement of air is "Essentially<br>Stopped." "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | H.  Construction.       A         H. South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attice Bypass Inspection – The Green Rater will conduct a visual Attice Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a visual Attice Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressured at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressured at 25 Pascals to conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a infrared scan when the fouse or dwelling unit is depressured at 25 Pascals to conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and Conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and conduct a visual Attice Bypass Inspection and                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Buildings under Construction.       Description         H. South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Buildings under Construction.       A         H. South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attice Bypass Inspection – The Green Rater will conduct a visual Attice Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conduct a visual Attice Bypass Inspection and conduct a                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Buildings under Construction.       D.       Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and conduct a visual Attic Bypass Inspection and                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Buildings under Construction.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and Applications.         U.S. Environmental Protection Agency:       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and Conduct a infrared Scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. U.S. Environmental Protection Agency:       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and Conduct a infrared Scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and Contractor shall notify the Architect and Green Verifier. Contractor shall notify the Contractor shall notify the Contractor shall schedule the inspection with no less than two weeks' notice to the Green Verifier. Contractor shall schedule access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared         J. Ohio Housing Finance Agency       Stopped." "Essentially Stopped" means that air leakage will not be detected by an infr                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Buildings under Construction.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and Applications.         I. U.S. Environmental Protection Agency:       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. U.S. Environmental Protection Agency:       D. Attic Bypass Inspection with no less than two weeks' notice to detect any leaks in the attic. Contractor shall schedule row weeks' notice to the Green Verifier. Contractor shall schedule row the Green Verifier. Contractor shall schedule row the Green Verifier. Contractor shall notify the Architect and Green Verifier.         1. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section on the Green Verifier. Contractor shall schedule row test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         3. EPA 402-K-01-002 - A Step-by-Step Guide on how to Build Radon-Resistant Homes       E.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | G. Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         H. South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant       D. Attic Bypass Inspection - The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to         U. S. Environmental Protection Agency:       detect any leaks in the attic. Contractor shall Inotify the Architect and Green Verifier         1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 3. Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         1. South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to the Green Verifier. Contractor shall provide access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         2. EPA 402-K-01:002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bypass Sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 3. Sheet Metal and Air Conditioning Contractors: SMACNA İAQ - IAQ Guidelines for Occupied       9. attic access points         Buildings under Construction.       9. attic access points         1. South Coast Air Quality Management District: SCAQMD Rule 1168 - Adhesive and Sealant Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to detect any leaks in the attic. Contractor shall notify the Architect and Green Verifier         1. EPA 832-R-92-005 - Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices.       D. Attic Bypass Inspection with no less than two weeks' notice to the Green Verifier. Contractor shall provide access to each unit and cooperate with conducting of the test. Additional inspections necessary due to incomplete work shall be back-charged to the Contractor.         2. EPA 402-K-01:002 – A Step-by-Step Guide on how to Build Radon-Resistant Homes       E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stoped" means that air leakage will not be detected by an infrared scan when the house or dwelling unit is depressured at 25 Pascals. Materials used for bypass Sealing are determined by the size and location of the bypass. These materials   Attic bypasse are sealed in such a manner that the movement of air is "Essentially Stopped" means that air leakage will not be detected by an infrared                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | F. Green Seal: CS-11 - Product Specific Environmental Requirements.       8. electrical work and         G. Sheet Metal and Air Conditioning Contractors: SMACNA IAQ - IAQ Guidelines for Occupied<br>Buildings under Construction.       9. attic access points         H. South Coast Air Quality, Management District: SCAQMD Rule 1168 - Adhesive and Sealant<br>Applications.       D. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and<br>conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals to<br>defect any leaks in the attic. Contractor shall notify the Axhietet and Green Verifier<br>immediately. Contractor shall notify the Axhietet and Green Verifier<br>Dolution Prevention Plans and Best Management Practices.         2. EPA Baseline IAQ - Testing for Indoor Air Quality, Baseline IAQ, and Materials Section<br>0 1445.       D. Attic bypasses are sealed in such a manner that the movement of air is "Essentially<br>Stopped" "Essentially Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially<br>Stopped" "Essentially Stopped" "Essentially Stopped" Essentially<br>Stopped" "Essentially Stopped" "Essentially Stopped" Essentially<br>Stopped" "Essentially Stopped" Essentially Stopped" Essentially Stopped Stop Pascas. Materials used for<br>bypass sealing are determined by the size and location of the bypass. These materials                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <ul> <li>Forest Stewardship Council: FSC Guidelines-Forest                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Increast Stewardship Council: FSC Guidelines- Foreist Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals toU.S. Environmental Protection Agency.0. Attic Bypass Inspection Plans and Best Management for Construction Activities: Developing mollution Provention Plans and Best Management Practices.2. EPA Baseline IAQ. Testing for Indoor Air Quality, Baseline IAQ, and Materials Section of 445.E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stoped" menns that iir leakgewill not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conducting of the test. Additional Inspections necessary due to incomplete work shall be beck-charged to the Contractor.3. EPA 402-K01-002 – A Step-by-Step Guide on how to Build Radon-Resistant HomesE. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stoped" menns that air leakgewill in the detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals.1. Limited Scope Rehabilitation Sustainability StandardE. Attic bypasses are galed in such a manner that tir leakgewill not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypass sealing are determined by the size and lo pointsU.S. Environmental Protection Agency.0. Attic Bypass Inspection – The Green Rater will conduct a visual Attic Bypass Inspection and conduct a infrared scan when the house or dwelling unit is depressurized at 25 Pascals toU.S. Environmental Protection Agency.0. Attic Bypass Inspection Plans and Best Management for Construction Activities: Developing mollution Provention Plans and Best Management Practices.2. EPA Baseline IAQ. Testing for Indoor Air Quality, Baseline IAQ, and Materials Section of 445.E. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stoped" menns that iir leakgewill not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals to conducting of the test. Additional Inspections necessary due to incomplete work shall be beck-charged to the Contractor.3. EPA 402-K01-002 – A Step-by-Step Guide on how to Build Radon-Resistant HomesE. Attic bypasses are sealed in such a manner that the movement of air is "Essentially Stoped" menns that air leakgewill in the detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals.1. Limited Scope Rehabilitation Sustainability StandardE. Attic bypasses are galed in such a manner that tir leakgewill not be detected by an infrared scan when the house or dwelling unit is depressurized at 25 Pascals. Materials used for bypass sealing are determined by the size and lo
